

A Product Rich with Features

Developed after extensive research, the SiteWatch XPT is more than a self-pay station, it's also a powerful, yet flexible marketing and management tool that works equally well as a stand alone terminal or as part of a mixed operation with attended lanes.

Features & Benefits that Make the XPT Right for Your Site

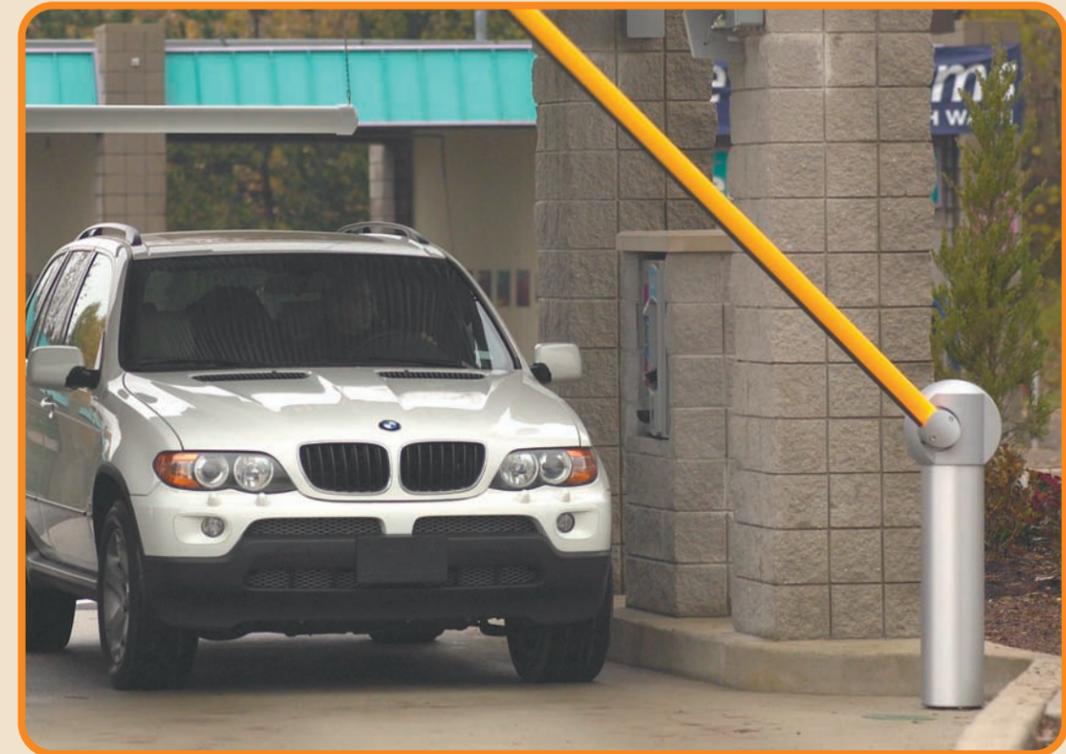

- Every XPT has both a touchscreen and an ATM-style interface, so your customers always have a choice
- Accepts monthly passes using the SiteWatch Automatic Recharge Module. Passes are renewed every month by automatically charging the customer's credit card
- WashCAP option allows you to sell and control washes through your retail fuel pumps
- Remote WashCAP option allows you to sell and control washes through retail fuel pumps at a neighboring service station owned by another business person
- Security features, including multiple locking points, steel in concrete anchor-base, as well as built-in alarm and camera
- Instant credit card clearing (less than 2 seconds)
- Accepts prepaid cards and ticket books
- No prepaid transaction fees
- Works with prepaid cards that have been loaded with dollar value or wash units
- Issues wash codes for prepaid receipts
- Loyalty Promotion Module to provide frequency discounts and incentives to your repeat customers
- Displays special on-screen menu for loyalty club members
- Barcode scanner to read club cards, as well as coupon ads and mailers
- Customizable audio visual messaging on 10.4" color screen
- Runs on SiteWatch system and provides separate reports for each terminal
- Built-in receipt printer
- Intelligent Receipt Messaging prints special offers and selling messages tailored to individual customers
- Alerts & Bulletins provides real time data about each self-pay terminal to off-site computer, cell phone or hand-held terminal
- Controls up to eight lanes with gates, each lane with an 80 vehicle-per-hour capacity
- Easily adapted for specialized uses, such as accepting only credit cards or prepaid cards to minimize cash handling
- Replication Logic allows chain-wide loyalty and prepaid promotions by ensuring that all terminals at multi-site operation always have current customer history data
- Lockable front panel and cash box, keyed separately so receipt paper can be changed without access to cash
- Ultrasonic proximity sensor
- Ergonomic design – menu, bill acceptor, credit card reader, and all other functions needed to complete a transaction are located in an accessible 14 x 19-inch "strike zone," so customers do not have to bend or reach
- Works with in-bay automatic as well as tunnel applications. The same prepaid cards sold at tunnel can be used at an in-bay automatic off-site.
- FastPass® uses radio frequency identification to read vehicle stickers
- Full-time 24/7 support from DRB Systems' staff of over 50 support specialists

"Simply installing self-pay machines won't please customers. To remove labor and replace (it) with technology isn't the answer. The customer has to see something else besides a service they've lost. They have to see an added level of convenience, or some sort of value delivered..." – Michael Roberts, analyst Cap Gemini Ernst & Young.

The Xpress Pay Terminal® completes transactions using FastPass® wireless acceptance tags, prepaid cards, credit cards, fuel pump receipts, cash or tokens.

The SiteWatch® Xpress Pay Terminal®

Faster Transactions, More Control, Greater Customer Satisfaction

DRB Systems, Inc.

7 Reasons Why You Should Consider The SiteWatch® Xpress Pay Terminal (XPT®)

Looking for a self-pay station for your exterior wash? Thinking of adding an express lane to your flex-serve or full-service site? Here are a few reasons why the XPT should be your choice.

- 1 Speed and Volume** – Saves time for your busy customers, and increases your productivity by processing up to 80 cars per hour. Process cars even faster using FastPass® tags to identify vehicles by radio signal and complete transactions – without customers even rolling down windows.
- 2 High Security** – Built-in camera and alarm, multiple locking points, multiple steel tubes in concrete base, stainless steel plate enclosure and seam-welded bill chute.
- 3 Customer Convenience** – Customers control entire transaction, with their choice of payment options, including prepaid cards/tickets (no transaction fees), cash, and instantly cleared credit cards.
- 4 Marketing Power** – Full loyalty promotion capabilities, barcode reader for direct mail and newspaper coupons. WashCAP option allows customers to buy washes at fuel pumps and redeem them at an XPT.
- 5 Flexibility** – Use the XPT for an express lane at a full-service wash or as a stand-alone unit at an express exterior. Also works as a credit card, prepaid card or monthly pass terminal only. Full reporting provides tight control in any configuration.
- 6 Automatic Monthly Pass Billing** – Works with SiteWatch Automatic Recharge Module (ARM) and FastPass to process monthly pass customers. Passes are renewed every month by automatically billing customer credit cards.
- 7 Grows With Your Business** – Replication Logic feature shares information between all XPTs and home office, allowing loyalty promotions and prepaid sales to be run at multiple sites without sacrificing control.

Up to eight XPTs can be supported at a single site.

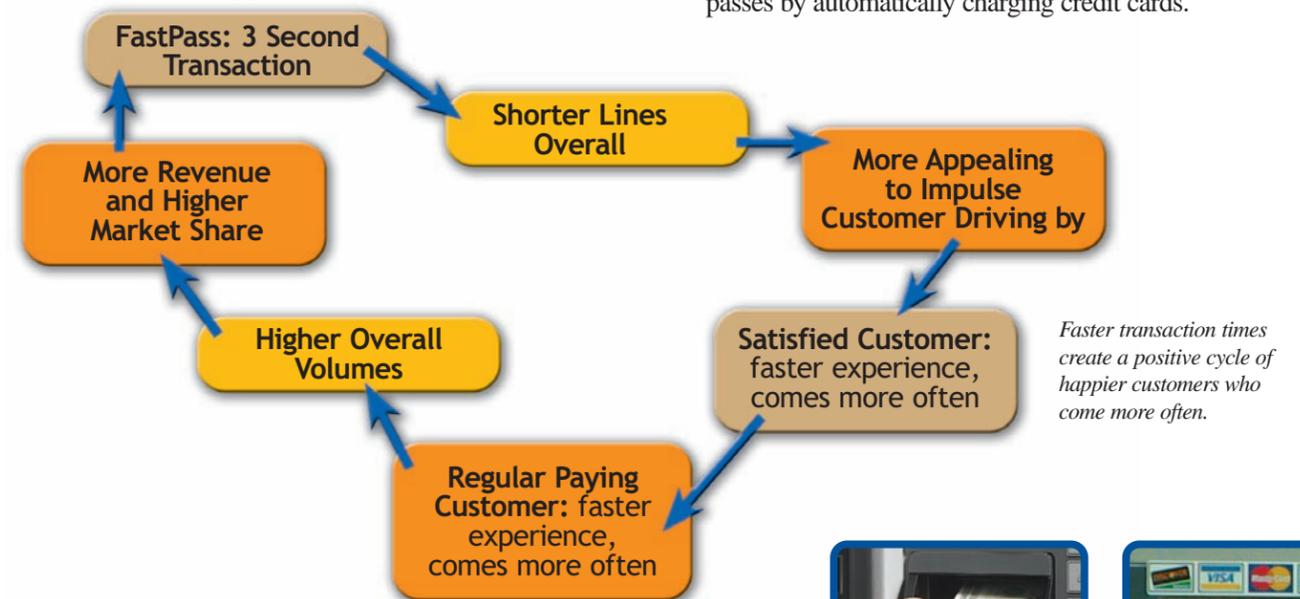

Faster Moving Lines = Positive Feedback Cycle

As more of your customers use monthly passes and FastPass® tags, lines move faster for everyone.

Monthly Passes, FastPass® and the XPT

1. When customers sign up for monthly passes, you swipe their credit cards (this information is stored by SiteWatch) and place a FastPass tag on the windshield.
2. When customers pull up to your XPT, SiteWatch instantly reads FastPass tags, and calls up monthly pass files to approve the transaction.
3. At the end of the month, SiteWatch ARM renews passes by automatically charging credit cards.

High Security Features

- 1 Built-In Camera and Alarm** – These fundamental deterrents are standard in the XPT.
- 2 Protected Bill Validator** – The XPT's very small (3" x 1.5") bill validator opening protects against anyone drilling to pull out bills.
- 3 Rear Guard Design** – There are no large opening mounting plates in the back of the XPT, which eliminates a possible entry point.
- 4 Multiple Locking Points** – Locks outside and inside, including the money compartment.
- 5 Secure Enclosures** – Heavy duty screen glass and stainless steel interior plate enclosure.
- 6 Welded Bill Chute** – Makes it more difficult to compromise the unit.
- 7 Steel In Concrete Base** – Rugged steel tubes in concrete anchor the XPT, to protect against anyone pulling it out with a truck.

Proven Performance In The Real World.

Express Exteriors, Flex-Serves, Multi-Profit Centers, In-Bay Automatics, Single Locations, Multi-Site Operations

Fast, reliable, user-friendly and able to handle high traffic volumes – the SiteWatch Xpress Pay Terminal (XPT) is proving itself at busy carwashes across the country. Here's how industry leaders are using the XPT to increase throughput and profits:

1. One of our customers processed over 1,400 vehicles in one day at the three XPTs in his express exterior.
2. The three XPTs at another site completed over 180 transactions in an hour.
3. More than 2,000 club plan members with FastPass® vehicle identification stickers use the XPTs at a Midwest site.
4. At one flex-serve, the user-friendly XPT has increased dollars per vehicle by 8.2% over exterior-only transactions.
5. Over 75 cars have been processed in one hour by a single XPT.

Now your customers have a choice! The XPT offers both a touchscreen and an ATM-style interface.

You recognize their names, these industry-leaders recognize the proven performance of the SiteWatch XPT from DRB Systems: *Southland Auto Wash*, Grand Rapids, MI; *Ride-n-Shine*, Fresno, CA; *Busy Bee Car Wash*, Miami, FL; *Mister Car Wash*, Houston, TX and Tucson, AZ; *Bill's Car Wash*, Orlando, FL; *Fuller's Car Wash*, Chicago, IL; *ScrubaDub*, Boston, MA; *Buc-ees Car Wash*, Houston, TX; *Star Car Wash*, Dallas, TX; *Tidal Wave Auto Spa*, Thomaston, GA; *Golden Nozzle Car Washes*, Springfield, MA; *Red Carpet USA, LLC*, Manhattan Beach, CA; *Bill's Car Wash & Appearance*, Fern Park, FL; *Octopus Car Wash*, Albuquerque, NM; *Quick N Clean Express Wash*, Scottsdale, AZ; *Cobblestone Auto Spa*, Scottsdale, AZ and many more.

Powerful, Profit-Building Features Designed Into Every XPT

An effective loyalty building tool, the XPT can show a special member menu for club members.

Customer Friendly "Strike Zone"

The XPT provides customers with a convenient, comfortable interface. Every function needed for a transaction is located in an easy-to-reach "strike zone" measuring 14" x 19".

Tight Security

Designed by experts with extensive experience in building outdoor cash accepting equipment, the XPT offers a variety of security features, like multiple locking points inside and outside the unit, an ultra-tight (3" x 1.5") bill validator opening to protect against theft, a built-in shock sensor alarm and camera, and break-in resistant glass on the screen.

Every Unit Has Both Touchscreen and ATM-Style Interface

Now you can give your customers a choice, because the XPT includes both a touchscreen and ATM-style interface. Since customers can select whichever interface they're most comfortable with, they'll feel more at ease using the XPT, making them more receptive to your marketing messages.

Attractive Audio/Visual Feature

Informative, friendly and easy to follow, the XPT's audio/visual interface is available in English and Spanish. It can also be customized very easily for your carwash.

Weather Resistant Reliability

Designed for a carwash environment, the XPT was built to withstand sun, wind, snow and most other weather conditions Mother Nature dishes out. The XPT is also backed by our dedicated 24/7 support team.

Barcode Reader

A powerful marketing tool, the XPT allows you to accept barcode prepaid cards as well as coupons from newspaper ads, mailings and emailings. The XPT supports a wide range of barcodes, including UPC-A,

UPC-E, EAN-8, 12 of 5, Code 39, Code 93 and Code 128.

Instant Card Clearing

The XPT clears credit card transactions in less than two seconds.

A Marketing Marvel

More than just a self-pay station, the XPT is a powerful marketing tool that helps you build repeat business and reach new customers.

Wireless FastPass® Tags – Uses Radio Frequency Identification to read business card sized tags on vehicle windshields, so SiteWatch can authorize transactions in seconds, without even requiring customers to roll down their windows. Ideal for processing prepaid and monthly pass customers.

Monthly Passes – As part of the SiteWatch System, the XPT makes it easy to sell and control monthly passes without getting buried in paperwork. The SiteWatch Automatic Recharge Module (ARM) automatically renews passes every month by billing customer credit cards. Process monthly pass customers at the XPT using FastPass tags for super quick and convenient transactions.

Loyalty Promotions

Build repeat business with loyalty cards. A special menu with its own set of prices can be shown for loyalty club customers. XPT receipts can show loyalty and prepaid customers their account status.

Simplifies Prepaid and Gift Card Sales

With no transaction fees, more revenues from prepaid sales go directly to your bottom line. You choose the plan to accept prepaid cards with a dollar value or wash units. Take advantage of off-site sales – expand your market by selling prepaid cards off-site from your conveyor, c-store, quick lube or another location.

Sell Washes From Fuel Pumps

WashCAP option makes it easy to sell and control washes from your fuel pumps with numerically coded receipts. Our Remote WashCAP option lets you sell washes from neighboring service station pumps owned by another business person.

House Accounts

Issue FastPass tags or barcode cards to house accounts, and bill them later. You can also sell house accounts monthly passes that are renewed automatically via credit card billing.

Advertising – The XPT's built-in barcode reader helps generate traffic by accepting coupons from newspaper ads, direct mailers and cash register receipts.

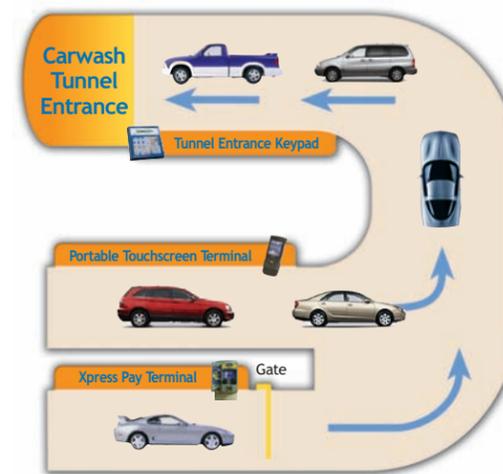

Intelligent Receipts – Print selling messages on XPT receipts tailored to individual customers based on their purchases or their membership in your loyalty club. The XPT can print barcodes on receipts that can be read the next visit.

One Location or Multi-Site Operation

It doesn't matter whether you have one location or a multi-site operation, you can run the same promotions and accept the same prepaid cards, FastPass tags and monthly passes at all of your XPT terminals without sacrificing control.

A Flexible Profit-Building Tool

The XPT works effectively in a variety of configurations.

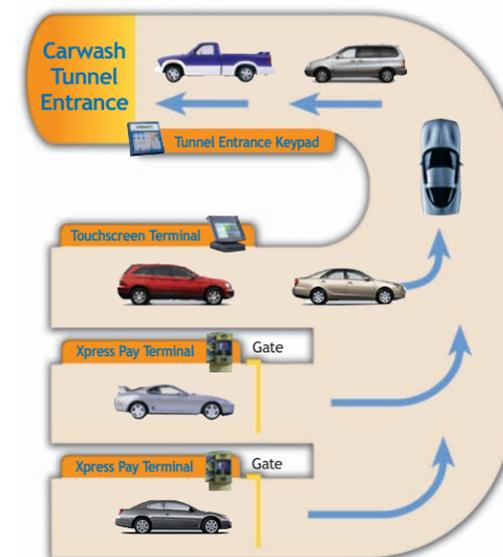

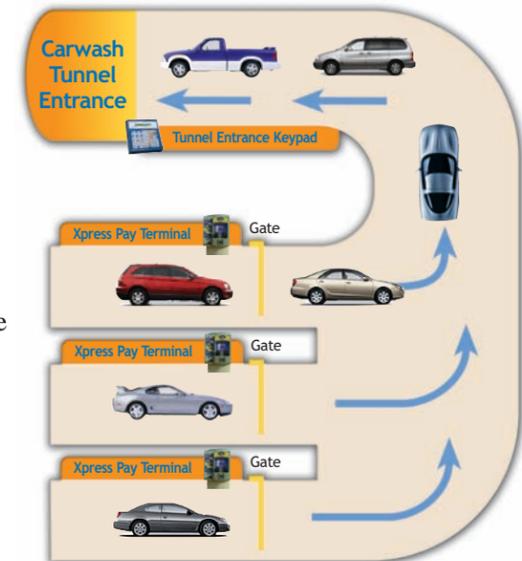

As an Express Lane at Your Full-Service Carwash

- Issues a unique car number for express lanes at full-serve operation, so customers can purchase washes on their own without waiting in full-service lane.
- Can be set up to accept only credit cards or only prepaid cards, minimizing cash control issues.
- Works with same prepaid cards as full-serve conveyor.

As a Self-Pay Station at Your Express Exterior

- Up to eight XPT stations can be used per site, making it ideal for high-volume operations.
- Easily queues vehicles, ensuring that each car is matched to the wash that was purchased for it. A merge zone feature assures that only one gate is opened at a time.
- Built-in shock sensor alarm, optional surveillance camera, and other advanced security features.

As an Unattended Pay Station at Mixed-Use Sites

- The XPT can work in conjunction with the Portable Touchscreen Terminal (PTT), the Touchscreen Terminal (TST) or any SiteWatch cashier station. This allows mixed-lanes for added service options for your customer.
- Gates work with up to eight stations, be they PTTs, XPTs, or TSTs.
- Accepts prepaid cards and receipts sold at conveyor wash, quick lube, detail shop, gas pumps or c-store.
